

ENVIRONMENTAL POLICY

INTRODUCTION

At Enjoy we recognize the challenges posed by climate change and the importance of proper environmental management. Economic growth must be based on the efficient and responsible use of natural and energy resources, in order to ensure care for the environment, and thus guarantee the long-term sustainability of our business.

By virtue of the foregoing, the Company is committed to protecting and improving energy performance through sustainable development, continuous improvement and the prevention of pollution in all its activities, ensuring the availability of information and resources to relevant Stakeholders necessary to achieve these objectives in accordance with the provisions of the regulations in force in the countries it operates.

We are also convinced that these objectives can only be achieved with the constant participation of those of us who are part of the Company, which is why it integrates a perspective of continuous, participative and multidisciplinary improvement in all its processes.

OBJETIVE

The objective of this policy is to establish the basic principles by which Enjoy and all its collaborators must be governed, in order to promote sustainable development, continuous improvement and pollution prevention in all its activities.

SCOPE

This corporate policy, is applicable to Enjoy S.A. and its subsidiaries and demand compliance from its collaborators.

COMMITMENTS

Our management is based on strict compliance with legal obligations and the other requirements of the country's environmental and energy framework; the will to incorporate the best practices that are compatible with the exercise of our economic activity and the establishment of other agreements to which the company subscribes, related to environmental and energy aspects:

- Deliver quality service to clients and a pleasant atmosphere to its collaborators, complying with current environmental legislation.

- Contribute to caring for the environment in the activities it carries out, constantly seeking the most efficient use of its resources and prevention of contamination.
- Take charge of their waste, through proper management of them, establishing waste management plans in business and corporate units.
- Contribute to the community in which our businesses are developed, through a cordial relationship, caring for and protecting the environment in which they are located.
- Motivate and inform our collaborators, promoting their participation, creation and innovation in the service and compliance with this policy.
- Deliver information to our clients about measures they can contribute to caring for the environment.
- Establish, implement and maintain an environmental and energy management system in accordance with current regulations.
- Achieve continuous improvement of energy and environmental processes and performance through the establishment and development of management objectives, goals and indicators.
- Promote the rational and efficient use of resources and the reduction of emissions in all of the Company's operations, through campaigns that seek to project its concern for energy consumption, commitment to the environment and sustainable development.
- Promote and support the acquisition of energy efficient products and services, as well as adopt energy efficiency as a fundamental pillar in the construction of its future projects and in the maintenance of its current operations.
- Promote waste management through, among others, specific plans that seek to recycle or reuse the waste generated as a result of our operation.
